Miss Estelle Gailbreath,
Gainesboro, Tenn.
Dear Miss Gailbreath:

I have yours of the 3rd, relative to teacher's receiving pay for the time lost as result of the influenza epidemic. In reply can say I have an opinion from the Attorney General of the State, in which he says that teachers are entitled to receive their salaries for this time lost. This is the legal side of the question, and it now becomes a problem for you and your Board to solve. I think they are receiving their salaries in nearly every county in the state.

Hoping that this matter may be settled satisfactorily, I am

Yours very truly,

S. W. Sherill.

Swift & Company's 1918 Earnings

How They Affected You

During the twelve months ended Nov. 2, 1918 (its fiscal year), Swift & Company transacted the largest volume of business on the smallest margin of profit in its history.

Profits of the meat business—under regulations of the United States Food Administration—were limited to a maximum of 9 per cent on capital employed but not to exceed 2½ cents per dollar of sales.

Swift & Company in the regulated departments earned 7.57 per cent on capital employed and 2.04 cents per dollar of sales, out of which had to be paid interest on borrowed money and taxes. Here is how these earnings affect you.

Live-Stock Raiser—

Swift & Company killed 14,948,000 head of livestock, which weighed alive, 4,971,500,000 pounds.

Swift & Company made a profit of only a fraction of a cent per pound liveweight.

Consumer—

The sales of our meat departments were 4,012,579,000 pounds on which our earnings were less than ½ cent per pound.

The per capita consumption of meat in the United States is given as 170 pounds. If a consumer purchased only Swift & Company's products he would contribute only about 78 cents a year, or 1½ cents a week as profit to the company.
